## Model for Saudi National Day

Students will prepare any model related to Saudi traditions and culture and submit this project on Monday 19<sup>th</sup> Sept.

**QHS RESEARCH PROJECT POLICY**  
**Academic Year 2022 – 2023**

Studies have revealed that research helps restore and protect memory and enhances mathematics and problem-solving skills of students.

Research also prepares the minds – especially the young minds - for a better understanding of concepts and theories. A student's learning capacity is greatly improved, and they can perform better in comparison to who is reluctant to research.

Therefore, as a policy of the school management, on the weekly plan all students will receive information about their assigned project requirements and the date for submissions.

**All Students are therefore requested to note that the project evaluations will be based on the following set of standards & criterion:**

- Your project must present an innovative idea.
- It does not matter how simple it is; however, it should be original.
- Use of various aids (Internet, Encyclopedia, Reference Books, etc.) to collect your data is allowed; however, just copying your project from them is prohibited.
- You should know that your project contributes to your overall evaluation. As such you should put in your best to present a good project model.
- Please feel free to consult your subject teacher during all your project preparation stages.
- Note: Projects will be submitted to the subject teachers on Classera Platform.
- Real-Life Projects should be sent to teachers in the classroom.
