**Weekly Value**

**Project for Saudi National Day**

Students will prepare any model related to Saudi traditions and culture and submit this project on Monday 19<sup>th</sup> Sept.

**QHIS RESEARCH PROJECT POLICY**  
**Academic Year 2022 – 2023**

Studies have revealed that research helps restore and protect memory and enhances mathematics and problem-solving skills of students.

Research also prepares the minds – especially the young minds - for a better understanding of concepts and theories. A student's learning capacity is greatly improved, and they can perform better in comparison to who is reluctant to research.

Therefore, as a policy of the school management, on the weekly plan all students will receive information about their assigned project requirements and the date for submissions.

**All Students are therefore requested to note that the project evaluations will be based on the following set of standards & criterion:**

- Your project must present an innovative idea.
- It does not matter how simple it is; however, it should be original.
- Use of various aids (Internet, Encyclopedia, Reference Books, etc.) to collect your data is allowed; however, just copying your project from them is prohibited.
- You should know that your project contributes to your overall evaluation. As such you should put in your best to present a good project model.
- Please feel free to consult your subject teacher during all your project preparation stages.
- Note: Projects will be submitted to the subject teachers on Classera Platform.
- Real-Life Projects should be sent to teachers in the classroom.

Subject	Topic	Submission Date
English	Use the pictorial Story to create your own story, showing the sequence of incidents.	10/11/2022
Science	Use the Simple Objects available at your home to create new Science Models like, Dish-Soap Bubbles, A Cell Phone Stand, A Car using Cardboards etc.	10/11/2022
Compter	Using MS word program, write some types of data and give an example of each type.	10/11/2022
Math	Use Simple Objects to Create a Math's Table - from 2 to 10. Use Math's to Compute Areas and Perimeters of Different types of Shapes, Make Models of Different Types of Angles, make different Polygons using Matchsticks.	10/11/2022
